

# RESILIENCE After Dark

**Resilience AFTER DARK** is a four-way blend features top-performing NTEP tall fescue cultivars that have scored high in dark genetic color. It provides the same benefits as Resilience II, but a shade **darker!** Ideal for home lawns, sports fields, golf courses, and low-maintenance areas in cool-season and transition zones.

**Suggested Maintenance:** For best results, fertilize at least twice during the growing season and water as needed, approximately every three weeks or when drought symptoms are observed. The ideal mowing height is 2–4 inches. This mix shows excellent drought tolerance and is a great choice for lawns without an irrigation system.

## COMPOSITION

25% Xanadu Turf Type Tall Fescue  
25% Rover Turf Type Tall Fescue  
25% Triad Turf Type Tall Fescue  
25% Valsetz Turf Type Tall Fescue
